

Kindergarten Surround

This month we have many fun and exciting themes to learn about. The first week of May we will be talking about butterflies and will learn all about the different stages. We are also fortunate enough to be able to get real caterpillars and will be able to watch them as they transform into beautiful butterflies. Be sure to come in and take a look.

During the second week we will be talking about insects. We will go on hunts for all sorts of creepy crawlers. The third week of May will be dedicated to manners. We will get a refresher about using our manners as well as learn new manners. Make sure to ask your child to use his/ her manners at home as well.

The fourth, and final week, is going to be all about health and nutrition. The children will learn all about the food pyramid and what is healthy and non-healthy food. We will end the week with a fun nutrition game.

Don't forget Sunblock!!!!

The sun is finally out and shining bright. Please do not forget to put sunblock on your child every day.

We will go out every day (weather permitting) and all children need to wear sneakers. **NO OPEN TOE SHOES.**

Please update your child's extra clothing bin. Accidents happen and the children have grown since the beginning of the year. Every child should have extra change of clothes in their cubby or back pack.
